Our Books

Today we live in a world without borders where competition in every aspect of life is fiercer than ever before. Therefore, to maintain a competitive edge, we need our students to be well prepared and ready to compete with not only their Nepali peers but also with students from around the world. Our books are the foundation for developing effective and equitable education for ESOL (English Speakers of Other Language) students. We are constantly in touch with schools, teachers and students to know their needs and expectations. To fulfil the schools and teachers' demands and at the same time keep up our standard.

It is no doubt that there are an array of materials for students to look into, however, it is only certain that this opportunity is delivered to the students only through the books of KEDC.

School Mathematics/ Maths World

This book series bridges the gap between mainstream curriculum or the government curriculum with the practical everyday lessons. The course was structured in a way that makes maths simple by teaching the concepts in a way that makes maths simple in a step by step manner. School Mathematics has been written by teachers who are experts in primary to secondary mathematics. This book series encourages teachers to work as a stimulator, promoter, and researcher with respect to the possible relationship that can exist between teaching and students' lived experiences.

Young Learners' DELIGHTS

A multi-genre reading course in English that seeks to bring the richness of literature from around the world in the classrooms. The texts have been carefully selected from the world of authentic children's literature and adapted and abridged whenever necessary to suit the students. Each book in the course invites the students to use their imaginations, expand their vocabularies and gain a better understanding of themselves and the world around them.

Moreover, varieties of activities in all the three stages of reading (pre, while and post) engage the students actively in the learning process and motivate them to think critically and respond creatively. The book also includes works that are done not just by famous writers from the past but also contemporary children writers such as Ronald Dahl. Delights serve as a mirror in which children see themselves reflected and a window through which they can explore the world around them.

English in Practice

This book series, which is in Nepal based graded course in the English Language, covers the skills of listening, speaking, reading and writing while focusing on both accuracy and fluency. Throughout each book, a link between grammatical form and communicative function is consistently maintained. Fluency is achieved through information-gap tasks, pair work, group work, class activities and role plays. The book teaches students to understand the language that is at a slightly higher level than they can produce, and this prepares them to make a transition from the classroom to the real world. English in Practice a comprehensive English language course is easy to follow, with clearly identified teaching points, carefully organised and sequenced units, comfortable pacing and stimulating, enjoyable learning tasks that fit the need of Nepali students.

Positive Living [Moral Science]

Our **Positive Living** book starts from grade 1 until grade 8, which illustrates the reality of life at different age levels. It has practical information that the students can use immediately to improve themselves and gain a competitive advantage in school, at home and in the wider society. Instances that happen on the day to day lives are considered and are given as examples for the students to relate to the book's concept. Thus, the book becomes a realistic guide for the students which results in a deeper understanding of theories discussed in each chapter. Additionally, students are taught to appreciate the uniqueness of each individual including themselves and as a growing individual, they are taught to invest in themselves by planning their goals by realising their strengths and weaknesses in scholastic and in moral values. Students will realise that one of the surest ways to gain a competitive advantage in every aspect of life is by 'personal development'.

Hello Grammar

Hello Grammar, a series of English grammar books designed for students from grade one to ten, is a break from the conventional past. It seeks to present grammar to students in a fun way and engages them in the creative production of language. Its primary purpose is to make the students aware of the underlying systems of language so that they can use it creatively in real situations and contexts. In other words, Hello Grammar incorporates the teaching and learning of grammar in the larger context of helping students to become competent and knowledgeable users of the English language.

Maths Art

Mathematics lessons at school level in most cases are too abstract and traditional that demand rote learning for the memorization of facts, figures, and formulae without clear meaning and using them in some routine problems, has been an obstacle in student's creativity, imagination and logical coherence.

Maths art is a series of school maths carefully prepared and designed to help students learn maths playing with manipulatives to generalize mathematics facts, figure, formula and concepts by themselves. While they learn mathematics with Maths Art, they can **Touch, Feel and See** mathematics. The activities they do are **Self-motivational Creative and Imaginative**. Maths Art helps to concretize the abstract ideas and helps to visualize them. Maths Art is not a book but a practical Manual accompanied with all needed manipulative at the back side in the book.

Also includes

- Together with teachers.
- Evaluation sheet
- VIVA questions.
- Glossary
- Variations and additional practical activities in each practical.
- Games, puzzles and just for fun activities.

Integrated Curriculum (Class 1 - 3)

Government of Nepal, Ministry of Education, Science and Technology has recently unveiled National Curriculum Framework. According to these framework, there would be an Integrated Curriculum from Grade 1 to 3. This integrated curriculum interlinks learning of more than one domain or learning area to promote holistic learning through 'minds-on' and 'hand-on' learning processes.

English in Practice, Hamro Serofero, Nepali Bhasha Sansar and Math World books of integrated curriculum after combination of appealing features not found in other existing books of same grade. A focus of important skills, gender equality, authentic material, concise notes, lively illustrations, outstanding supplements all these may prompt you to decide that this series are best suited to the needs of today's Nepali students.

Hello Kids Pre School Series

The aim of our series is to introduce the importance of play and learn in the educational institutions in a child friendly environment. Play is a mean by which children externalize their inner nature and enhance their natural abilities. We also focus on the point that parents and kindergarten teachers understand child's nature and stages of development. For that our series conduct Preschool Teachers Training program and Parent's Orientation program on play way method.

Hello kids pre-primary set includes:

Theme: The main objective of this theme book is to encourage the child to wonder, explore, ask question and learn. Through this theme based learning children can relate themselves to their everyday life, their homes, environment and community.

English: The content of this book focuses on building foundation for basic english that includes listening, speaking, reading and writing.

Math: This book will enhance the knowledge of number and Pre-math. Through this book children will develop their spatial awareness and understand the different kinds of shapes around us.

Writer: Diki Sherpa, Jashmine Rai, Romy Lama, Sunita Vishwakarma

Hello Kids Pre School Series

Project Work Book: Teachers can use this Book for Homework, Classwork, Free work/ Small Group Teaching and even exam purpose. This book contains work sheets of four subjects English, Nepali, Math and Theme on weekly basis. The main objective of this book is to reinforce what children have learned in classroom and to encourage parents to actively involve in their child's learning.

नेपाली: नेपाली किताब पूर्वबाल्यावस्थाका बालबालिकाहरूको सर्वाङ्गीण विकासमा सहायता पुऱ्याउनको लागि विभिन्न चित्रात्मक कार्यहरू समावेश गरी तयार पारिएको पाठ्यसामग्री हो । यसमा यसका साथै बालबालिकाको सोचन सक्ने क्षमताको विकासमा अझ वृद्धि ल्याउन बालबालिकाको लागि सिर्जनात्मक तथा विभिन्न समस्याको समाधान आफै गर्न सक्ने किसिमका क्रियाकलाप पनि संलग्न छन् ।

Pre-school Teachers Training Program

Pre-school Teachers Training program includes Play Way method in their course curriculum. It helps teachers to internalize the importance of educating the very young students by following the play way principles.

About KEDC

Kantipur Education Development Council (KEDC) is a premier publication house and education service provider in Nepal. Our core focus is creating high-quality educational resources for students across all grades at the school level, creating a learning experience that's engaging, enjoyable and informative.

KEDC is known for its exemplary educational materials that supplement the core curriculum. Our courses are based upon current research and best practices in education. We are constantly investigating new trends and developments in educational pedagogy to effectively meet the needs of today's students. Our resources teach through a variety of methods and within a variety of mediums to meet the growing needs of teachers, educators, and students. Evidently, the textbooks and educational resources that we produce cover a wide range of activity types and learning styles.

Our textbooks are aligned with the national education framework and in accordance with the curriculum designed by Curriculum Development Center (CDC), Sano Thimi. We are relentlessly committed in our contribution to the national education goal of Nepal.

Please have a look at our products and services in the inner pages.
